

THE WORLD'S MOST ACCURATE PSYCHEDELICS WEIGHING SYSTEM

POWERED BY SYNAPSE

Echelon is the most accurate weighing system on the market today, with astounding 10x greater accuracy than it's closest competitor. Unlike traditional combination weighing systems, Echelon's modular design boasts a small footprint and can perform over 30 million weighing combinations within a fraction of a second. Echelon can accurately weigh both dried mushrooms, virtually any infused gummie or edible and is powered by proprietary artificial intelligence technology that enables it to 'learn' in real-time.
